

#ERUNNKER LVL RANGE

THE BUNKER LVL RANGE

Structural Laminated Veneer Lumber (LVL) is a reliable and durable engineered wood product designed to handle heavy loads in construction. Its strength comes from thin layers of wood veneers bonded together, creating a consistent, stable material that won't warp or shrink over time. Ideal for beams, joists, lintels, and rafters, LVL provides dependable support and is easy to work with on-site, making it a go-to choice for builders looking for strength and efficiency in their projects.
