

Introducing the NEW ModWood Snap-LOC Clip

For ModWood 137mm and 88mm Natural Grain Collection Decking

How Does the KlevaKlip Snap-LOC Work?

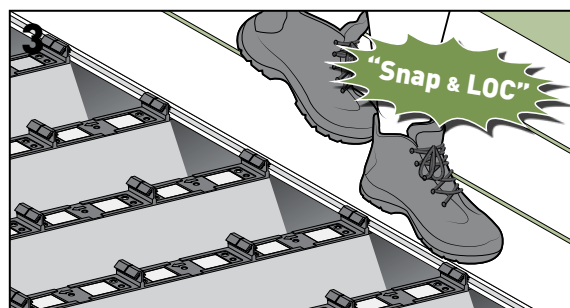

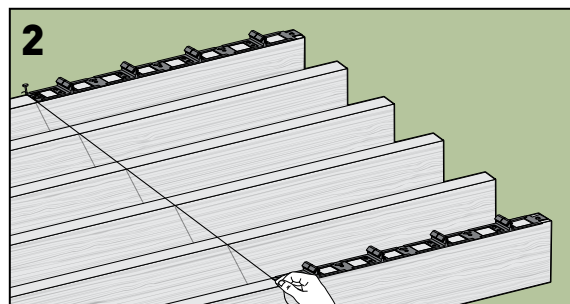

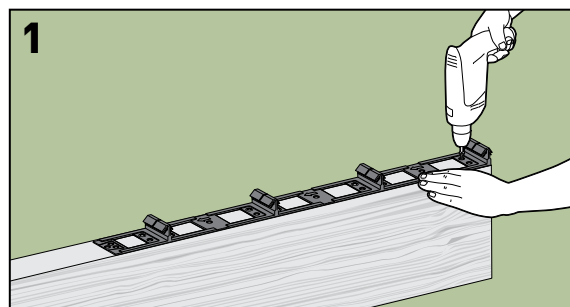

KlevaKlip is a multi-board, fixed pitch decking system that provides consistent gapping between the boards. The new **Snap-LOC** clips allow the boards to be snapped into the clip by the weight of someone “walking the board into the clip”. The teeth of the clip flex, allowing the board to insert into the clip, then “snap” into the groove of the board, locking it in place. Made from UV stabilised engineering polymer, the **Snap-LOC** clip is built to last the life of your deck.

Features and Benefits

- Super-fast fixing system – up to three times faster than conventional concealed fixing systems.
- Extremely easy to use – almost impossible to get wrong. Dove-tail joiner ensures there is never a run-out in your deck.
- Equally easy to use on timber or steel joists.
- Can be fixed to joists with screws, connector nails, or by nail gun.
- As clip is made from a tough, strong engineered nylon, it is easy to “shoot” down using a nail gun. This makes for an extremely fast fixing time as a clip can be fixed to the joist in a matter of seconds.
- Minimal adhesive required compared to current ModWood clips. (check installation instructions/video for details)
- New design allows much wider teeth - gives greater holding power over approximately 32mm in width rather than “single point” holding as with current ModWood clips.
- Being Engineered Nylon, one clip fits all environments.*

Basic How to Install**

ModWood Snap-LOC Clips

Code	Material Type	Box Items	Size	Boards Held	Suitability for
KSL137N	Engineered Nylon	40	573 x 40mm	4	137mm ModWood Natural Grain Collection
KSL88N	Engineered Nylon	40	559 x 40mm	6	88mm ModWood Natural Grain Collection

ModWood Metal Clips

Code	Material Type	Colour	Clip Type	Box Items	Size	Boards Held	Suitability for
KT137G	Gal	Natural	Top-fix	40	568 x 60mm	4	137mm ModWood Natural Grain Collection
KT137S	Stainless	Natural	Top-fix	40	568 x 60mm	4	137mm ModWood Natural Grain Collection
KT88G	Gal	Natural	Top-fix	40	553 x 60mm	6	88mm ModWood Natural Grain Collection
KT88S	Stainless	Natural	Top-fix	40	553 x 60mm	6	88mm ModWood Natural Grain Collection

Coverage: 1 box of 40 clips provides coverage of 9.5-10 sqm, based on joist centres of 450mm. The ModWood Snap-LOC Clip adds 4mm to the joist height

* Traditional Metal clips should be used in bushfire-rated areas. ** Please refer to our website klevaklip.com.au for detailed instructions prior to commencing installation.
